

# Welcome!

Dr Mignon Hamman wishes to welcome you to Colab Health! Please visit our website at [www.colabhealth.co.za](http://www.colabhealth.co.za) for interesting blog articles, practice times and other relevant information

Colab Health is a paperless practice and all information will be communicated via the website, email or sms. It is thus very important to make sure your contact details are correct at each visit.

## What can I expect at my first consultation?

**Cost - First consultation/Yearly check-up:** R1350. Payment can be done via card/masterpass/QR payment - appropriate invoice and billing codes will be supplied in order to claim back from the medical aid. This fee **includes** side room investigations like ECG, urine testing and sugar testing where applicable but **excludes** procedures.

**Time length of first consultation:** 30-45min with Dr Mignon/Dr Karli

**Why the long appointment:** If the initial consultation can be comprehensive, a lot of the chronic conditions can be managed better and problems can be addressed fully

**Cost - Follow-up/Sick consultations:** Medical aid tariffs and will be claimed directly from your medical aid. In some cases a co-payment might apply. We are also a Premier Plus discovery practice. **Private patients: R630, this is only for the consultation**

Colab Health is registered with **ALL the SA medical aids** but a co-payment might apply. If you have medical insurance/Discovery Key care you will need to pay cash at each visit

Please note that the laboratory is a separate business and has its own payment structure.

**How do I book follow-up appointments:**

You can phone the practice at 066 272 7488 / 012 881 3330, go to our website or register at mygrandcentral (mygc.co.za) for online bookings

I will try my utmost best to be on time for your appointment - **please understand that if you arrive late without informing the practice your appointment will be rescheduled/canceled/shortened**

**What should you bring:**

ID/drivers license card

Medical aid card

ALL relevant old X-rays, blood tests (We can request these from Ampath/Lancet/Pathcare if we are informed beforehand)

ALL chronic medication - a list/photo will be sufficient

To all my new and old patients; to a mutually beneficial health partnership!

Regards

*Mignon Hamman*
